

Microphones and Earphones

MIC-200 Headband Microphone

The MIC-200 headband microphone is very popular for its high quality, yet affordable price. This microphone is suitable for tour guide systems, language interpretation, classrooms, assistive listening, as well as in conjunction with wireless microphones and other applications. Its unidirectional pattern minimizes background noise by focusing on the voice sound. Some other features include: innovative appearance, light weight, excellent mechanical properties, flexibility, metallic gooseneck arm, abrasion and strength resistance. Each MIC-200 microphone comes with a windscreen.

MIC-300 Professional Headband Microphone

The MIC-300 professional headband microphone has superior audio quality and maximum durability. This type of microphone is suitable for all kinds of lectures and speeches, tour guide systems, language interpretation, classrooms, assistive listening, as well as in conjunction with wireless microphones and other applications. It enjoys an excellent reputation as a high-quality, condenser microphone. Some of its highlights include: 360° adjustable and rotating microphone arm with metallic gooseneck for a perfect effect of voice pickup, superb mechanical properties, high audio quality, and wire cleverly set around the neck for the best concealed effect. Its neck band has a metal core with a smooth plastic sleeve for maximum comfort. Each MIC-300 microphone comes with a windscreen.

LAV-100 Lavalier Microphone

The LAV-100 is a professional lapel clip microphone with excellent audio quality, and a small, exquisite metal collar clip. It comes with a 3.5mm microphone plug and a 47-inch (1.2 m) cord. Its black aluminum body and metal clip make this a very durable and elegant microphone. The LAV-100 capsule has a directional pattern so that it can best respond to sound from the front, while rejecting sound that arrives from other directions. It is the best choice for speakers who need to disguise the use of a microphone. Unlike traditional handheld microphones, the LAV-100 can be attached to a person's clothing. Each LAV-100 microphone comes with a windscreen.

EAR-101/ EAR-102 Earphones

The Enersound EAR-101 & EAR-102 are single-ear clip-on earphones that fit easily over the ear. They are flexible, comfortable, easy to clean, reusable and have optimal sound quality. The EAR-101 has a mono 3.5mm gold-plated mini plug while the EAR-102 has a stereo 3.5mm gold-plated mini plug. The EAR-102 is the ideal choice for use with the R-120 receiver and other stereo listening devices. The EAR-101 is compatible with a wide variety of mono devices.
