

50-Person Portable Translation/Tourguide System | TSC-50

This 50-person Portable Wireless Translation/Tour guide System provides clear sound quality and full mobility, combining FM transmitter and receivers, as well as improved reliability and versatility. It can be expanded by adding an unlimited number of additional receivers.

More foreign languages/auditory sources can be added for a maximum of 4 in the same area by purchasing 1 additional transmitter and microphone per auditory source.

This system is ideal for factories, tourist attractions, zoos, theme parks, museums, schools, hotels and resorts, bus tours, courtrooms, business meetings and more.
