

Configuration:

LWS-10-A1 Listen EVERYWHERE 2 Channel Wi-Fi System with 2 Receivers (United States)

Product Overview:

The new Listen EVERYWHERE receiver makes the Listen EVERYWHERE assistive listening system compliant with the Americans with Disabilities Act (ADA). The LWS-10 system is a convenient and reliable way to stream audio to both the dedicated Listen EVERYWHERE receivers, as well as to guests' smartphones who have downloaded the Listen EVERYWHERE mobile app. Connect to your existing Wi-Fi network service and stream audio to up to 1000 users. Cloud-based management allows for simple management of the system, including updates and customization options. Additionally, in-app features support custom welcome messages, videos, banners, and more, all providing another point of contact with your clients and customers.

Listen EVERYWHERE is an excellent assistive listening choice for houses of worship, museums, theatres, classrooms, corporate boardrooms, conference rooms, and more.

This system contains a reconditioned and repurposed mobile device, which has been altered to perform only the function of assistive listening via the Listen EVERYWHERE application, with no other device services or applications accessible. This product is being offered to you from Listen Technologies who has no affiliation with the original manufacturer (OM), Samsung Electronics Co., Ltd, or any carrier. OM has not reconditioned or repurposed this mobile device, is not related in any way to the parties who have recycled, repurposed, and repackaged it, and expressly disclaims all warranties with respect to its performance. OM will not provide any product or service assistance, product use information, software upgrades, rebates, or recalls. All product warranties and service assistance are offered solely from Listen Technologies.

Highlights:

- 2 Channel system
