

Whether you desire to hear the information given to you by your health care professional, the soft voice of your grandchild, or a one-on-one discussion with a friend or family member, The Pocketalker can help.

The Pocketalker is an out-of-the-box hearing assistance solution that helps you stay connected and involved by amplifying the sounds and voices most important to you – at a fraction of the cost of hearing aids.

### One-on-one Discussions

### Health Professionals

### Restaurants

### Car Conversations

### Television Listening

Hear what you want to hear by amplifying the sounds and voices most important to you.

Simply plug the included earphone or headphone into the headphone jack. Position the internal microphone near the preferred sound and adjust the volume and tone control until the sounds you want to hear are clear.

The Pocketalker personal amplifier is used to amplify specific sounds or voices. It helps you hear what you want to hear by reducing distracting background noise.
